OFFICE OF THE GENERAL MANAGER, GOVERNMENT SANDALWOOD OIL FACTORY, MYSORE.

Dated 29th October 1969.

Sub :—Detailed Tender Notification No. P. 32/69-70, dated 29th October 1969 for fabrication and supply of three copper stills required by the Government Sandalwood Oil Factories. Due at 4-00 P.M. on 27th November 1969, which will be opened at 4-05 P.M. on the same day.

No. P. 32. Sealed Tenders duly superscribed as above will be received in this Office of the General Manager, Government Sandalwood Oil Factory, Mysore as detailed above. The Tender Deposit of Rs. 1,500 should be accompanied with the tender. The remittance of tender deposit may be made at the office of the undersigned, receipt obtained and enclosed to the tender. Remittance may also be made by means of Bank Drafts payable at this end. No cheques will be received. Rates quoted should be firm based on delivery at the Factory premises. Sales Tax and any other charges may be quoted separately.

The tenderers are requested to quote for the following :—

1 Rate per still should be quoted for delivery F. O. R. Mysore Factory and F. O. R. Shimoga Factory. The copper sheets will be supplied by the Factory based on the actual requirements. Except Copper sheets no other materials will be supplied by the factory to the successful tenderers. The successful tenderer should deposit 10% of the value of the order or should deposit a sum of Rs. 1,500 only whichever is more. Any safety clause or clauses in the interest of Government work will also be imposed for which the successful tenderer should abide by the same. The successful tenderer should execute a stamped agreement on Rs. 2-25 p. stamped paper. The period of delivery should be stated. The stills may be examined at the Factory during working hours and the drawing of the same may be perused, (which will be ready at this office) during working hours of the Factory. The successful tenderer should give a written statement as to the satis factory work done and also should undertake to rectify the defects if any after the unit is put into service.

Details are as under

1 6' Dia × 8' Long Cylinderical body with cone shaped top and bottom (size of cone 1/3 hight ×6' dia slant height 3' 3"). Stills prepared out of best copper sheets of 1/8" thick with lap jointed and reveted double row flat head copper revets and joint soldered leak proof with the following component parts. The required copper sheets only will be supplied by the Factory.

2 Two numbers 14" opening G. M. Manholes with lids on top stills and three numbers 14" opening G. M. Manholes with lids at the bottom to be provided for still as shown in the sketch. The Manholes to be grooved to take up the packing ropes (1/1" groove). The contractor should supply all the gun metal component parts. Further the contractor should drill all the manholes ring to be provided with 3/8" holes brass studs and nuts and all the manhole lids must be provided with suitable handles so as to lift easily from the still. The manhole rings have to be welded to obtain 2" clearance from the surface of the still, so as to handle the manhole easily.

3 Perforated plates in five pieces made out of 1/8" copper sheets (necessary sheets will be given by the Factory) with drilled holes 1/8" dia. 9 holes to an inch, securely supported on 2" ×1/2", T. Iron horizontally supported and placed on 2½" x5/16" angle iron ring in two pieces (to be provided by the contractor). The preforated plates has to be covered the surface of the cylinderical portion of the still at bottom cone 6 Nos of 3" ×3/8" angle Iron br cket to support the iron ring to be fixed to the body of the still 6" above the bottom cone as per sketch. Further the perforated sheets which rests on the angle iron ring rest on the bottom cone of the inside surface, and the angle iron need not be reveted to the body of the still.

4 Steam inlet copper perforated pipe to be provided (only copper pipe will be given by the factory) with G.M. Cross fitted at the bottom cone. 4 Nos. 2" OD × 1/16" copper pipe with holes drilled on half the periphery of the pipe, one end for 3 number dummied joined together at the centre by a G. M. cross and one end connected to steam main as per sketch (Contractor should supply the gunmetal parts). Further the steam pipe must be placed horizontally to the bottom cone of the still.

5 Baffle plates, made out of thick copper plate 15" dia fixed 3" below the top opening to goose neck of the still to divert the vapour in a zig-zag path (only necessary copper sheet will be given by the Factory).

6 Gun metal flange threaded 1" gas thread and fitted at the bottom cone and revetted and a one inch G. M. gland cock fitted for drain off.

7 Copper goose neck pipe made out of 1/8" thick copper sheet, comprising of one 4' x 12" dia verheal piece, one piece goose neck head and one horizontal pipe of 3' long as shown in the sketch. (Copper sheet will be given by the Factory) the contractor should provide himself with gun metal parts. Further, the goose neck pipe unit must be bifercated on three pieces comprising of one straight pipe piece of 4' x 12" dia and one goose neck head piece and one 3' long horizontal pipe of 4" dia opening towards goose neck piece and 3" dia opening towards condensor with flanges on both ends as shown in the sketch. The straight pipe ring and goose neck head ring must be provided with 3/8" x 1/2" holes and bolts and nuts of the same size.

8 Stand for the still fabricated out of mild steel structural material 6 Nos. of 3' x 10" high 3" x 3" x 3/8' T. Iron Stanchions over which 4" x 3/8" thick flat iron ring of 6" dia shapped to bed the still bottom cone and rest as per sketch. (this should be provided by the contractor.)

9 The Contractor should use pure gun metal alloy for the flanges and manhole rings and handles etc., and also goose neck pipe flanges and rings etc.

Other Items and Conditions.

1 The intending tenderers may inspect the existing stills at the Factory at Mysore or Shimoga and obtain any other details.

2 The over all size and shape should be similar to those in services at the Factories.

3 The interior walls of the stills to be tinned.

4 Monthly progress of work in construction of still should be shown and the entire order completed within two months from the date of acceptance of the order.

5 The rates to be quoted for the entire work using necessary material and labour wherever necessary except copper sheet provided by the Factory. All other items should be provided by the Contractor himself, and delivery at the factory Railway siding in Mysore South.

6 Sales Tax to be specifically quoted extra.

7 The tenderers should furnish cerificates of having undertaken manufacture of such stills.

8 The construction of still is subject to inepection by the Factory staff and minor alterations and suggestions made by them during progress of construction to be incorporated without extra cost.

9 Security Deposit equal to the value of the materials supplied by the Factory to be furnished by the Contractor.

10 The Contractor should keep satisfactory account for the material issued by the Factory.

The decision of the Director of Sandalwood Oil Factories, Bangalore in acceptances of the lowest tender or the highest etc., rests with the Director of Sandalwood Oil Factories in Mysore, Bangalore. The tenderers may also note that it is not obligatory on the part of the Factory to place an indent for item No. 2 as detailed in the Items indicated (1 and 2 of Page 1).
